

Levenmouth Community Energy Project

Dedicated website – No

Organisation webpage – Yes

Centralised portal – No

Objectives/Success Criteria – No

Closedown/final report – No

Open-source data – No

Peer-reviewed academic output (Primary Subject / Referenced) - 0 / 3

Brochures/Case Studies/Videos – Yes

On-line major conference/event presentations - 3

Dissemination Event / Output available – 0 / 0

Follow-on project – No

Consumer Engagement

Consumer Participation – No

Consumer Feedback – No

Output Summary

Progress reports – No

Detailed and objective final report – No

Project method detailed – No

Performance to objectives detailed – No

Lessons learned identified – No

Policy/Regulation implications reviewed – No

Outcomes vs. Objectives/Targets

Performance to objectives – Not defined

Key Findings

- Development of a zero carbon energy cycle is practical.
- Hydrogen equipment has a high capital cost, which results in hydrogen currently being more expensive than the diesel equivalent.
- High operating costs.
