Dedicated website – Broken Link

Organisation webpage – No

Centralised portal – Cordis

Objectives/Success Criteria – Yes

Closedown/final report – Yes

Open-source data – No

Peer-reviewed academic output (Primary Subject / Referenced) - 3 / 0

Brochures/Case Studies/Videos – No

On-line major conference/event presentations - 0

Dissemination Event / Output available – 3 / 0

Follow-on project – No

Consumer Engagement

Consumer Participation – No

Consumer Feedback – No

Output Summary

Progress reports – No

Detailed and objective final report – Yes

Project method detailed – Limited

Performance to objectives detailed – No

Lessons learned identified – Yes/Limited/No

Policy/Regulation implications reviewed – No

Outcomes vs. Objectives/Targets

Performance to objectives – not assessed

Key Findings

- Collective optimisation of energy systems, targeting the district scale, is more efficient than single building approaches.
- A 20% reduction in energy demand can be achieved using smart grid optimisation tools.
